BPP Learning Media is an ACCA Approved Content Provider. Our partnership with ACCA means that our Study Texts, Practice & Revision Kits and iPass (for CBE papers only) are subject to a thorough ACCA examining team review. Our suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

This reference work provides the reader with an up-to-date and extensive overview of the vast amount of primary law relating to judicial review. This important area of law concerns the High Court's function as a watchdog over the decision-making process of public bodies in England and Wales, for example government agencies and public authorities. The handbook is structured around 50 principles which are, in turn, supported and expanded by commentary, cases and supplementary material.

BPP Learning Media is an ACCA approved content provider. Our suite of study tools will provide you with all the accurate and up-to-date material you need for exam success.

Being brilliant at networking is the essential skill for personal and career success, whether going after a dream job, branching out and starting a business or simply to meet new people. With new and updated chapters, the second edition of this book will show you how to become a brilliant networker. Packed full of tried and tested techniques and secrets from some of the UK ' s most successful networkers, Brilliant Networking, Second Edition contains useful tools, anecdotes and real life examples of people who have used networking to secure their dream jobs, make career moves, grow their business or even find their life partner, to those who network and connect people professionally for a living.

Today, certain computer software systems exist which surpass the computational ability of researchers when their mathematical techniques are applied to many areas of science and engineering. These computer systems can perform a large portion of the calculations seen in mathematical analysis. Despite this massive power, thousands of people use these systems as a routine resource for everyday calculations. These software programs are commonly called "Computer Algebra" systems. They have names such as MACSYMA, MAPLE, muMATH, REDUCE and SMP. They are receiving credit as a computational aid with in creating regularity in articles in the scientific and engineering literature. When most people think about computers and scientific research these days, they imagine a machine grinding away, processing numbers arithmetically. It is not generally realized that, for a number of years, computers have been performing non-numeric computations. This means, for example, that one inputs an equation and obtains a closed form analytic answer. It is these Computer Algebra systems, their capabilities, and applications which are the subject of the papers in this volume.
