(Automotive And Air

Conditioning  
The heater in your car is basically a smaller

7th Edition  
version of your cooling systems radiator. Hot

Automotive  
Systems Books  
engine coolant is circulated through a

small radiator, often times called a heater

core. A fan is positioned in front of the heater

core to blow cold outside air over the fins.

As this air travels over

Access Free

Automotive

the heater core, it heats up and becomes the hot air which blows out your heater vents.

# Access Free Automotive & Service ... And Air

All automotive air conditioning systems are (nearly) closed loops with a high-pressure side and low-pressure side.

We'll start with the high-pressure side as it leads from the engine to the passenger compartment:  
Compressor: The compressor is a pump driven by a belt attached to the engine's

Access Free

Automotive

crankshaft. When the refrigerant is drawn into the compressor, it is in a low-pressure gaseous form.
