Why Dietary Fiber Is a Menace with Konstantin Monastyrsky

Incidentally, that's the meaning of those brass screws in the cereal bowl on the front cover of my Fiber Menace book. This myth—that fruits and vegetables are the best source of fiber—is probably the most pervasive and damaging of all. If fiber is what you're really after, you're better off getting it from fiber supplements.

Fibre is NOT a necessity for a healthy diet! Can this be true?

A high fiber diet is broadly recommended to prevent diverticular disease based on unconfirmed, unproven, untested, and speculative "theories" that a low fiber diet causes this pathology. It's the complete opposite – a high fiber diet is the primary cause of diverticular disease and related complications.
