by Dennis Harwood. Bob Beck Hulda Clark. The Zapper is a small electronic device developed by Dr. Hulda Clark and her son, Geoff Clark, that delivers an electrical current to the body of approximately 7 to 8 volts, with some units going as high as 15 volts. The distinguishing feature of a zapper is that it is designed to produce a square wave with a frequency of about 30KHz (Kilohertz) to 32KHz.

Dr. Hulda Clark's definition of "zapper" also excludes most "Rife type" devices that I have tested, which generally produce AC output, with negative pulses that can make parasites GROW. See "The Cure for HIV and AIDS," page 71, third paragraph, for details on the dangers of negative pulses.

In addition, Dr Beck also designed a magnetic pulser to treat infected lymph glands and other sites of infection, tumours and other parts of the body with poor blood supply. A strong but very short magnetic pulse (20 K Gauss or higher) induces a tiny current in the cells and body fluids up to 10 or 20 cm into the body.

This book introduces the 3 kinds of investigations that can be made with a syncrometer. In the first kind of investigation, you can detect entities in your body, taken as a whole. For example, mercury aflatoxin, Streptococcus pneumonia, Epstein Barre virus, orthophosphotyrosine, benzene. Such a test is not as sensitive as the organ test, described next, but for this reason allows you to select those entities most abundant in the body and therefore of special significance; in the second, you can identify which organs contain a particular entity. For example, the mercury may be in the kidney, the Streptococcus in the joints, and so on. This allows you to embark on a cleanup program for your body in a focused way. The syncrometer lets you monitor your progress. And finally, you can detect entities in products. For example, lead in your household water, thulium in your reverse osmosis water, asbestos in your sugar.

Noreen Martin has been diagnosed with AIDS. Is she dying? Is she contagious? Is she an emaciated shell of her former self, wearing a red ribbon, coming up to Capital Hill to testify, seeking more NIH funding to fight this horrible disease? Actually, the answers are No, No and No. Rather, she is a feisty, healthy, hearty housewife living in Charleston, South Carolina with her devoted husband, Robert. She is in great health. Let me repeat-great health.A-ha, says the medical expert-she is a living testament to the wonders of modern medicine. Obviously, the life-saving antiretrovirals must have reduced her viral load to "undetectable" levels. Well, actually, No. She stopped taking the AIDS drugs over a year ago.So, what gives? Mrs. Martin's tale is an important one for all self-proclaimed AIDS experts-those who pontificate endlessly about the accuracy of the tests, the dangers of the virus, and the safety of medications, when, in fact, an accumulating body of purely scientific evidence suggests the converse-that the tests are unreliable, that the virus is inert, and the medications will kill your liver and raise the risk of heart attack."If you have been told that you are "HIV positive", at any time in your life, I strongly recommend that you read this book by this courageous woman, who has seen it all, navigated around earnest, but ill-informed doctors, and has restored herself to great health. It just may save your life."-D. D. Steele, attorney in San Francisco

You probably know that food, water, sunlight, and oxygen are required for life, but there is a fifth element of health that is equally vital and often overlooked: The Earth ' s magnetic field and its corresponding PEMFs (pulsed electromagnetic fields). The two main components of Earth ' s PEMFs, the Schumann and Geomagnetic frequencies, are so essential that NASA and the Russian space program equip their spacecrafts with devices that replicate these frequencies. These frequencies are absolutely necessary for the human body ' s circadian rhythms, energy production, and even keeping the body free from pain. But there is a big problem on planet earth right now, rather, a twofold problem, as to why we are no longer getting these life-nurturing energies of the earth. In this book we ' ll explore the current problem and how the new science of PEMF therapy (a branch of energy medicine), based on modern quantum field theory, is the solution to this problem, with the many benefits listed below: • eliminate pain and inflammation naturally • get deep, rejuvenating sleep • increase your energy and vitality • feel younger, stronger, and more flexible • keep your bones strong and healthy • help your body with healing and regeneration • improve circulation and heart health • plus many more benefits

Power Tools for Health fills this gap in knowledge by dissecting hundreds of double-blind studies and real-life case studies. Power Tools for Health has no focus or emphasis on any specific commercial device. Instead, Dr. Pawluk brings his extensive experience to report on many of the leading PEMF systems available today,
