Normal Transition: A Birth. The transition from fetus to neonate, commonly called birth, is one of the most profound changes that human will ever undergo. During this transition, the fetus ceases to receive blood, oxygen, and nutrients from the maternal circulation and must derive those things from the outside world.

New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery. New in the 7th edition! Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate Two new chapters added covering post-resuscitation care and preparing for resuscitation 140+ new full-color photographs replacing most line drawings

CD includes: full text plus dramatic footage of actual resuscitation events, laryngoscopic view of the airway, digitized animation, review questions, and learner-directed interactive video scenarios.

Written in a conversational style, the 3rd edition of the ACLS Study Guide features unique, user-friendly, and easy to remember treatment algorithms - totally revised to reflect the 2005 emergency cardiac care guidelines. Full-color throughout, it offers a complete, concise

overview of advanced cardiovascular life support (ACLS), acute coronary syndromes, and acute stroke. It also features easy-to-access information with Stop and Review quizzes in each chapter and a comprehensive pretest and posttest. New to this edition are a handy ACLS quick-reference fold-out card, a heart rate ruler, and more! In addition to being an outstanding study tool, the ACLS Study Guide, 3rd Edition is the official text for the American Safety and Health Institute ACLS certification course. For more information on ASHI courses, call 800-246-5101 or visit www.ashinstitute.com. A pretest and posttest, each containing 50 questions with answers and rationales, provide readers with opportunities to check comprehension prior to and after study. Chapter Objectives allow readers to preview the main points in each chapter. Quick Review boxes throughout the chapters and Stop and Review sections at the end of the chapters test reader comprehension of the material. Chapters 1-8 comprise a Preparatory section to provide the foundation for the case presentations in the second section. Ten case studies present real-life clinical situations enabling the reader to make decisions based on information in the Preparatory section. Consistent organization of case studies include Objective, Skills to Master, Rhythms to Master, Medications to Master, Related Text Chapters, Questions, Answers, Essential Actions, and Unacceptable Actions to aide in the study and mastery of material. Unique treatment algorithms - totally revised to reflect the 2005 emergency cardiac care guidelines - simplify the new treatment guidelines, making them easier to use and remember. Chapter on Stroke has now been expanded to include Special Resuscitation Situations. ACLS Pearl boxes contain key points and useful tips for clinical practice. Keeping it Simple boxes contain essential information in a clear and concise manner. A heart rate ruler is included to help

determine heart rate while practicing ECG recognition. A 4 x 6 pocket-size quick-reference card with key ACLS algorithms is included for field-use. Vascular Access and Medications combined into one chapter to present venous circulation information with all relevant common medications used during a cardiac-related emergency.

The STABLE Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. This learner manual serves as a student handbook for either self-study or instructor-led presentations. It includes more than 220 pages, illustrated in full color.

This special multimedia product of the new 6th edition Textbook of Neonatal Resuscitation includes the textbook with its accompanying DVD and the eBook version.

The extensively revised and updated 6th edition of the Neonatal Resuscitation Program (NRP) textbook is designed in accord with the program's curriculum changes and sharpened focus on active, hands-on learning. The text facilitates the newly recommended self-paced learning approach. Self-study is optimized to help students prepare for the mandatory online examination that replaces the traditional written test. It also complements the simulations and case-based scenarios at the heart of the new NRP. Content updates throughout the text reflect the 2010 American Academy of Pediatrics (AAP)/American Heart Association Guidelines for Neonatal Resuscitation. Must-know new material includes the latest recommendations across key areas of change including: Revisions in the NRP flow

diagram; elimination of evaluation of amniotic fluid in initial rapid assessment; use of supplemental oxygen during neonatal resuscitation; use of pulse oximetry; chest compression procedures.

This is a well-organized discussion of the most common issues, both clinical and psychosocial, of general pediatrics. The book covers a wide scope of topics from those as benign as thumb-sucking to those as devastating as HIV and childhood cancer. A case history opens each chapter to set the stage for a practical discussion of primary care pediatrics. This state-of-the-art reference emphasizes concepts in health promotion, illness prevention, and family and community participation. The book includes well-child care for normal children and adolescents. It also discusses premature infants, and children with specific needs such as patients with Down's Syndrome. Signs and symptoms are presented by body system in a logical approach.

As a registered nurse for the last 28 years, my primary clinical expertise has been working in the pre-hospital environment as a flight nurse and a paramedic, as well as continuing to work in a variety of clinical areas which include the emergency department, pediatrics and endoscopy. My extensive clinical background has also given me the opportunity to work as a legal nurse consultant with one of the largest law firms in Arizona. As an EMS educator and program director of paramedic training programs for the last 20 years and most recently as

the National Clinical Educator for one of the largest air medical transport companies, I truly enjoy teaching in a simple manner as to assure that students do have a strong basic understanding in making critical care decisions and that they will be providing the highest quality of patient care beginning from the least to the most invasive management of care for the patients they are transporting. My goal as a professional and as an EMS educator has always been and will continue to encourage students to have the desire to learn and grow in their profession, as well as contribute to EMS in a way that inspires positive change. "Tell me and I will forget; Show me and I may remember; Involve me and I will understand "
