coverage of the curriculum framework content and provides engaging exercises that promote problem solving and investigative strategies. Inclusion of summary and review sections after each topic help students retain learning, while Checkpoint-style questions assist their preparation for assessment. Learning Outcomes are provided at the start of each chapter to clearly map topics in the text to the syllabus. Numerous exercises are included, with clear progression, and problem-solving and real life applications embedded throughout. Helpful hints throughout the text guide students and remind them of the key pieces of information required.

This dictionary covers all aspects of finance and banking, from personal investments to international trading.

The Stage 9 Workbook supports and supplements the Stage 9 Student Book, with engaging exercises to support the curriculum framework. It provides summary notes for the theory required, extra questions for students to practice and apply the skills and knowledge they have gained, and space for pupils to write their answers in. The Stage 9 Teacher's CD provides a range of resources to assist in the teaching of the course, including interactive class activities to engage all your students, right across the ability range, revision activities to aid student retention, supplementary worksheets to support lower ability students and stretch more able learners, and answers to all the exercises in the Stage 9 Student Book and Workbook.

peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of

humanity away from catastrophe. Offering over 100 priorities for immediate action, The 2030 Spike serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

The groundbreaking exploration of the power of empathy by renowned child-psychiatrist Bruce D. Perry, co-author, with Oprah Winfrey, of What Happened to You? Born for Love reveals how and why the brain learns to bond with others—and is a stirring call to protect our children from new threats to their capacity to love.

Empathy, and the ties that bind people into relationships, are key elements of happiness. *Born for Love* is truly fascinating. — Gretchen Rubin, author of *The Happiness Project*

From birth, when babies' fingers instinctively cling to those of adults, their bodies and brains seek an intimate connection, a bond made possible by empathy—the ability to love and to share the feelings of others. In this provocative book, psychiatrist Bruce D. Perry and award-winning science journalist Maia Szalavitz interweave research and stories from Perry's practice with cutting-edge scientific studies and historical examples to explain how empathy develops, why it is essential for our development into healthy adults, and how to raise kids with empathy while navigating threats from technological change and other forces in the modern world. Perry and Szalavitz show that compassion underlies the

qualities that make society work—trust, altruism, collaboration, love, charity—and how difficulties related to empathy are key factors in social problems such as war, crime, racism, and mental illness. Even physical health, from infectious diseases to heart attacks, is deeply affected by our human connections to one another. As *Born for Love* reveals, recent changes in technology, child-rearing practices, education, and lifestyles are starting to rob children of necessary human contact and deep relationships—the essential foundation for empathy and a caring, healthy society. Sounding an important warning bell, *Born for Love* offers practical ideas for combating the negative influences of modern life and fostering positive social change to benefit us all.

This book outlines the so called 'contemporary Asian matriarchate'. In the twentieth century, six women have held the office of prime minister in South Asia. The pioneers were Sirimavo Bandaranaike of Sri Lanka-the world's first female prime minister-and Indira Gandhi, who headed the government of India. They were followed by Benazir Bhutto, the Prime Minister of Pakistan, Sheikh Hasina Wajed and Begum Khaleda Zia, who held same position in Bangladesh, and Chandrika Kumaratunga, the Sri Lankan President. Why should countries so long

associated with patriarchy and the subordination of women be the focus for so many politically prominent females? The analysts attribute it simply to inheritance as each of these women was a widow or daughter of a slain male national leader. Women have tended to move into top position of power under the most dramatic circumstances-as a result of military coups, attempted murder, and assassination. This book will try to unravel the question of how these six women have managed to take power and how they have been able to exploit to their benefit the traditions of sexuality, motherhood, and kinship in South Asia.

The God Delusion caused a sensation when it was published in 2006. Within weeks it became the most hotly debated topic, with Dawkins himself branded as either saint or sinner for presenting his

hard-hitting, impassioned rebuttal of religion of all types. His argument could hardly be more topical. While Europe is becoming increasingly secularized, the rise of religious fundamentalism, whether in the Middle East or Middle America, is dramatically and dangerously dividing opinion around the world. In America, and elsewhere, a vigorous dispute between 'intelligent design' and Darwinism is seriously undermining and restricting the teaching of science. In many countries religious dogma from medieval times still serves to abuse basic human rights such as women's and gay rights. And all from a belief in a God whose existence lacks evidence of any kind. Dawkins attacks God in all his forms. He eviscerates the major arguments for religion and demonstrates the supreme improbability of a supreme being. He shows how religion fuels war, foments bigotry and abuses
