Excessive concentrations of dietary glycine have also been reported toxic for *Calliphora erythrocephala* (Meig.) (Sedee, 1956). Nevertheless, this effect of glycine did not mask the effects of dietary concentrations of histidine (Table 2). Histidine is implicated in biosynthesis of purines in many organisms (West & Todd, 1955).

The second edition of a highly acclaimed handbook and ready reference. Unmatched in its breadth and quality, around 100 specialists from all over the world share their up-to-date expertise and experiences, including hundreds of protocols, complete with explanations, and hitherto unpublished troubleshooting hints. They cover all modern techniques for the handling, analysis and modification of RNAs and their complexes with proteins. Throughout, they bear the practising bench scientist in mind, providing quick and reliable access to a plethora of solutions for practical questions of RNA research, ranging from simple to highly complex. This broad scope allows the treatment of specialized methods side by side with basic biochemical techniques, making the book a real treasure trove for every researcher experimenting with RNA.
