African Violets: Gifts from Nature-The Series Book One In 1892 while on an evening stroll with his fiance in East Africa, Baron Walter von Saint Paul discovered an unusual plant with delicate purple flowers growing along a stream on his plantation. Legend has it that he picked a bouquet and presented it to his fiance, starting the world's love affair with the African violet. Today, this plant is indeed the most popular indoor flowering plant grown by gardeners and plant enthusiasts around the world. Whether your goal is to enjoy beautifully flowering African violets in your home, to become an expert grower of these lovely plants, or to develop a deeper understanding of how the plants function, a series of three books are being written to meet your needs. The Series provides you with an authoritative guide, taking you through all the steps necessary for growing elegant African violets and at the same time explaining to you the secrets of why the plants respond to the various growing practices used daily in their care. When writing about African violets, Melvin J. Robey's expertise, pragmatism, humor and love of the subject are clearly evident. The reader will find down-to-earth, up-to-date information in this first of three books in The Series of African Violets: Gifts from Nature. Your African violets won't flower? In this book eight common problems are explored, exposing the secrets to having plants whose crowning glory of blossoms tells everyone you are the superhero of the African violet world. You will also enjoy 44 dazzling color photographs and illustrations, along with several black and white illustrations.
